

Okihita H. Sihaloho, S.T.

AI-Supercharged Tech Lead & Product Architect

Jakarta, Indonesia | okihita@gmail.com | okihita.com | linkedin.com/in/okihita | github.com/okihita

PROFESSIONAL SUMMARY

Results-driven **Tech Lead & Product Architect** with **10+ years of hands-on software engineering leadership**—from scaling mobile banking super-apps serving **25M+ users** to architecting enterprise portals for **170,000+ employees**, building B2B national cinema intelligence dashboards with high-intensity automated scraping, solo-building React Native apps for iOS and Android, and engineering offline-first desktop suites (Rust/Tauri) and AI/LLM platforms. Combines deep technical execution (Next.js, TypeScript, Rust, Python, Go, AWS/GCP) with C-suite strategic consulting experience from **Accenture**. B.Eng. in Computer Science from Institut Teknologi Bandung (ITB).

Leverages self-hosted autonomous AI dev workflows (Hermes running DeepSeek 0731 Ultra on private VPS) and 24/7 agent swarm deployments for continuous task execution and rapid product iteration. Known for clear technical communication, empathetic team leadership, native-level business English, a relentless can-do attitude, and meticulous attention to detail with clean SOLID/DRY architecture standards—bringing technical rigor, operational clarity, and high-energy team culture.

TECHNICAL SKILLS

- **Core Languages:** TypeScript, Python, Rust, Go, Kotlin, C++, Swift, SQL
- **Mobile Engineering:** React Native (iOS & Android), Android Native (Jetpack Compose, Hilt, Clean Architecture)
- **Web & Desktop:** Next.js, React 19, Tauri 2.0 (Rust + React), Astro, TailwindCSS v4, D3-geo
- **Cloud & Infrastructure:** GCP (Cloud Architect in progress), AWS (EC2, Lambda, S3, ECS), Azure Functions, VPS Orchestration, Cloudflare, Vercel, Supabase (pgvector), Docker, CI/CD
- **AI & Agent Swarms:** Self-Hosted AI Agent Swarms (Hermes/VPS + DeepSeek 0731 Ultra), Smartwatch / Telegram Bot Remote Coding Workflows, Vercel AI SDK v4, RAG Architecture, Vector DBs, Gemini API, Vision OCR
- **Enterprise Software:** Microsoft Dynamics ERP, SDLC Governance, SecOps

WORK EXPERIENCE

Indie Engineer & AI Tech Consultant – Fullstack & Mobile Lead

Jan 2025 – Present

Jakarta, Indonesia

- **CineRadar (B2B Platform Architect):** Architected a B2B cinema intelligence platform aggregating **10,000+ daily showtimes** and real-time seating layouts across 496 theatres, reverse-engineering undocumented API endpoints and building high-intensity multi-agent scrapers, ticket purchase heatmaps, and a Supabase enterprise dashboard.
- **Zenius EdTech Mobile App:** Solo-architected and launched the brand-new React Native mobile app (net.zenius.mobile.android) for iOS and Android from greenfield to production, achieving **10,000+ downloads**, a **4.8+ Play Store rating**, and an industry-leading **0.19% crash rate** via Hermes engine tuning.
- **AI Agent Productivity Infrastructure:** Deployed a self-hosted autonomous AI agent swarm framework (Hermes + DeepSeek 0731 Ultra on private VPS) integrated with a custom Telegram bot and Smartwatch voice/touch interface for remote 24/7 coding execution, automated build verification, and instant test suite orchestration.
- **EngageMedia Digital Rights Suite:** Architected 2 regional civic-tech AI platforms for Southeast Asia across 11 nations—building **D.R.O.N.E.** (an AI policy observatory with Supabase pgvector RAG, Vercel AI SDK v4, and D3 vector mapping) and **MMAAII** (a bilingual AI incident & legal regulations matrix deployed on Cloudflare Pages).
- **PAKDE (Solo Creator):** Built a gamified, 100% offline-first cooperative productivity suite for Indonesian village cooperatives using Tauri 2.0 (Rust + React 19), automating SAK EP double-entry accounting for cross-platform Windows/macOS desktop apps (pakde.vercel.app).
- **Competitive AI Engineering:** Ranked **Top 15 / 150 engineers** in RedAI Triathlon 2025 (Red Asia x AWS AI competition) and **Top 5 / 100 teams** in Amarthax GDG Jakarta Hackathon (building an AI WhatsApp financial coach for micro-entrepreneurs).
- **Hackathon Mentorship & Tech Coaching:** Mentored aspiring developers and student teams to build and deploy competition-winning web applications, including **Transit Flow** (transit-flow-fe.vercel.app) and **Nusa Cipta** (nusacipta.aprilwang.id).

Business Integration Lead (Accenture) – Tech Lead & Consultant

Aug 2022 – Dec 2024

Jakarta, Indonesia

- **Mobile Banking Super-App (Squad Lead 1):** Led mobile squad deploying 6 mission-critical features—including NFC Tap-to-Pay, QRIS payments, and digital KYC verification—to **25M+ Android users** while ensuring 100% backward compatibility across legacy Android OS versions.
- **Mobile Banking Super-App (Squad Lead 2):** Architected and delivered next-gen banking app from greenfield conception to production release using modern Android stack (Jetpack Compose, Hilt, MVVM, Clean Architecture).
- **FMCG MNC Corporate Portal (Engineering Lead):** Managed a 3-engineer squad building an enterprise management portal for an MNC with **170,000+ corporate employees**, leveraging Azure Cloud Functions, serverless APIs, and microservices architecture.
- **Global NGO Digital Transformation:** Served as sole technical consultant for the Indonesian branch of a 100+ year old global NGO, translating operational bottlenecks into technical blueprints and presenting directly to C-level steering committees.

Android Lead (Zenius) – Engineering Manager & Mobile Lead

Oct 2021 – May 2022

Jakarta, Indonesia

- **Interactive Live-Streaming Engine:** Hands-on architected and deployed mission-critical interactive live-streaming feature (Agora.io SDK), powering real-time tutoring for **10M+ active students** during peak national exam surges.
- **Team Management & Mentorship:** Managed and coached 7 direct Android engineers, enforcing clean code standards, unit testing (Mockito/Espresso), and reducing overall APK bundle size by **25%**.

Android Lead & Product Owner (MusigPro) – Mobile Lead

May 2020 – Aug 2021

Remote, Singapore

- **Karaoke Super-App:** Single-handedly built a mobile karaoke Android application from greenfield codebase to production release, engineering offline audio storage, media manipulation, and real-time pitch detection algorithms.

Android Lead (SHOX) – Mobile Squad Lead

Mar 2019 – Feb 2020

Jakarta, Indonesia

- **AI-Powered E-Commerce Mobile App:** Architected a shoppable fashion inspiration app with user-generated content, managing cross-border engineering squads in China and India while implementing MVVM, Clean Architecture, and full Firebase/CleverTap analytics observability.

EDUCATION

B.Eng. Computer Science — Bandung Institute of Technology (STEI ITB)

Graduated 2015

Top Technology Institute in Indonesia | STEI ITB

NOTABLE HIGH-IMPACT PROJECTS

- **BijakMengeluh** (bijakmengeluh.id): AI-powered civic engagement platform helping citizens draft structured complaint letters and route them to appropriate Indonesian government agencies. Includes DPR members scraper sub-project.
- **Verlo:** Universal React Native (Expo 57) offline-first workout logger & 360° BDNF/Longevity tracker featuring 150+ exercise database.

INTERESTS & CERTIFICATIONS

- **Certifications:** GCP Cloud Architect (In Progress)
- **Passions:** Marathon runner (preparing for international marathons), certified open-water diver, analytical writing, voice actor for major streaming platforms.
